

Features

- Versatile compact unit for the professional acupuncturist
- Available in a range of laser wavelengths and output powers
- Ergonomic and light weight
- Fully compliant with International Laser Safety Standards

The AcuLASER therapy unit was designed for the professional acupuncturist. The unit consists of a light weight, robust and attractively finished hand probe, a rechargeable battery compartment and mains adaptor for recharging. The unit can be either mains or battery operated, with a battery life of 8 hours continuous use.

The unit incorporates a fixed 'on-time' delay timer which ensures that treatment times can be measured accurately. The hand probes are easily interchangeable, so that one rechargeable battery compartment and mains adaptor can be used with a range of different hand probes.

To ensure compliance with international laser safety standards the unit is fitted with a removable key switch which disables the laser thus preventing inadvertent operation.

All Laserex laser therapy units are supplied with batteries and include a 12 month warranty.

Specifications:

Laser Wavelengths	635nm, 650nm, 670nm, 780nm, 840nm & 904nm
Laser Output Power	4mW
Laser Beam Size	1-2mm diameter.
Laser Power Density	500mW/cm ²
Laser Class : 635, 650 & 670nm	Class 1
: 780, 840 & 904nm	Class 3b
Probe tip size	4mm
On time delay	0 - 30sec. (Factory set)
Battery Type	2 x 1.2 Volt AA NiMH (No memory)
Battery life	4 hours continuous use

This product is compliant with European and Australia/New Zealand laser safety standards 73/23/EEC - 98/37/EG, 89/336/EEC, EN 50081-1, EN-31252, EN-31252, EN 55022, EN 60825-1 and AS/NZS 2211:1997.
