

Alrad Imaging Newsletter June 2007

A regular look at what's new in the world of LED lighting products for imaging and machine vision

To coincide with the euroLED exhibition to be held on 6-7 June 2007 at the National Motorcycle Museum, Birmingham, our newsletter this month features the LED lighting products we distribute.

- Join us at euroLED Exhibition
- Photonic Optics
- V -Cubed
- Vision and Control
- Volpi
- V S Technology

Buy from ALRAD the Machine Vision Component Specialists

euroLED Exhibition

The 4th annual solid-state lighting conference and exhibition, euroLED 2007, is firmly established as Europe's premier event dedicated to solid-state lighting. This year it will be held at the National Motorcycle Museum near Birmingham on 6-7 June 2007. Don't miss it! **Alrad will be exhibiting the very latest in LED lighting products for industrial machine vision or microscopy applications.**

The companies we represent and distribute LED lighting products for are:-

Photonic Optics is an established Austrian manufacturer of lighting systems for industrial, research and microscopy applications. The company offers a keenly priced range of products based on LEDs, but also Cold Light Sources with Fibre Optic light guides and Fluorescent illumination so the whole spectrum of illumination products is offered. [More info.](#)

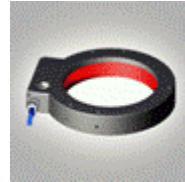

We are pleased to be able to offer you the V Cubed range of industrial LED Light lines.

They can be custom built to your requirements and are ideal for those long light lines required for industrial line scan camera applications where fibre optics can be expensive and with LEDs you have no concerns over short bulb life time. V Cubed also specialise in very high-intensity liquid cooled LED systems for particularly demanding applications. [More info.](#)

VISION &
WE MAKE THE COMPONENTS
control

Vision & Control, a driving force in the Machine vision scene in Germany, has set itself the target of becoming the Number 1 component supplier for Machine Vision in Europe. The company offers a very wide variety of products, including incident-, back-, darkfield- and telecentric lighting. High intensity LED spotlights and large-area panels are also available. [More info](#)

Volpi AG is the leading Swiss manufacturer of lighting systems for machine vision, microscopy and medical illumination systems. Volpi have two manufacturing plants one in Switzerland and the other in the USA. They offer a complete line of LED illumination products as well as cold light sources and light guides. Custom optical fibre products can be designed for unusual applications. [More info](#)

The VS Technology is a long-established Japanese manufacturer of optical and LED components for machine vision. Their LED lighting product line is quite comprehensive and covers a wide range of applications including ring lights, bar lights, dome lighting, co-axial lights and includes strobed options. [More info](#)

Z-Laser is a leading German manufacturer of laser projectors and 2D/3D Systems. They have recently introduced a range of laser emitters for machine vision applications. These lasers are either point or line lasers which are focusable and modulated. They can provide a variety of optics such as point, line-Gauss, line –Powell, line- raster, cross, target cross, multi-lines, point matrix etc. [More info](#)

For more information on any of these products please click on the appropriate "more info" link or talk to our sales staff on **01635 30345** or if you prefer email sales@alrad.co.uk with your requirements or go to our web site <http://www.alrad.co.uk>

Technology advice and information is available on our [FAQs/Applications](#) pages go to our web site <http://www.alrad.co.uk>

You have been sent this email because at some time in the past you have given us your email address.
