

Alrad is pleased to announce it can now supply specialist lenses and lighting products from Opto Engineering

Opto Engineering® designs and manufactures optical systems for imaging, metrology, sensors, projection and lasers.

Opto Engineering® is the fusion of old craftsmanship still needed for precision optics with fresh, innovative concepts and technologies.

For **Opto Engineering®** "innovation" means smart design and engineering as well as a business model targeting excellent quality-to-price ratios and a fast response to the market demands.

Products available include:-

Lenses

- **UV Bi- Telecentric lenses**
- **Pericentric lenses**
- **Catadioptric lenses**
- **Hole inspection lenses**
- **Micro Polyview optics**
- **F-Theta lenses**
- **Telecentric kits**
- **Zero distortion macro**

Lighting

- **LED pattern projectors**
- **LED spot illuminators**
- **Coaxial illuminators**
- **Ring LED illuminators**
- **Back light LED illuminators**
