

Title: Dual output HDMI and USB2.0 cameras from Artray

Alrad Imaging is pleased to offer two new cameras from Artray offering dual HDMI and USB2.0 outputs, so it does not matter if you want to display the image on a high resolution monitor or on a PC computer, you can do either with these cameras.

The **ARTCAM-130MI-HDMI** is a 1.3 MegaPixel CMOS camera with 1280 x 1024 pixel sensor and a rolling shutter while the **ARTCAM-150P4-HDMI** is a 1.5 MegaPixel CCD camera with 1392 x 1040 pixel sensor and a global shutter.

The cameras can be supplied with monochrome or colour sensors. The USB output can be selected for 8 or 10 bit images. Both cameras use progressive scan sensors and have a standard C mount lens fitting.
